

# Comparison of the RSR data tables published by the Housing Corporation in 2002 and 2003

**The aim of this report is to provide a guide on the content and comparability of the RSR 2003 tables with those produced in 2002. The RSR 2002 tables are used as a reference point for the comparison.**

This report should be used in conjunction with the sister report, The RSR Dataset in 2003: Technical Notes, which together provide a user's guide to the RSR 2003 data and outputs for data users. In 2002, the basis of reporting changed significantly from earlier years, details of which can be found in the report, The New RSR Dataset in 2002: Technical Notes which accompanied the RSR data outputs for 2002.

The main changes to the RSR 2003 were as follows:

- A change in the way registered care homes were reported following the implementation of the Care Standards Act 2000. The new Act removed the distinction between residential care homes and residential nursing homes that was previously used under the Registered Care Homes Act 1984. From the 2000 Act, the Housing Corporation made four distinctions of Care Homes;
  - i 'Care homes providing personal care' which fall within the definition of social housing and therefore, supported housing.
  - ii 'Care home providing nursing care' which are excluded from the definition of social housing and therefore outside the definition of supported housing.
  - iii 'Care homes not providing medicines or medical treatment' are excluded from the definition of social housing and are therefore outside the definition of supported housing.
  - iv 'Care homes providing adult placement' may fall within the definition of social housing as they may take place in general needs housing.
- The 'other' category in supported housing, Part A, was not included in 2003 as having analysed the data from 2002, it was found that many of the units in this category should have been included as unregistered supported housing, and the definition of unregistered supported housing was amended.
- An extra line for NASS contract Asylum seeker accommodation was included in Part B.
- Stock pending transfer into the housing association's ownership was excluded from Part C in 2003.

- The pre-printed categories in Part D were amended to better reflect the stock that had been included in 2002.
- Gender of Governing Body members was included in Part P of the 2003 return.
- Financial questions were removed from Part Q as HAs had difficulties in reporting this information – a decision was made to include this information in the Financial Returns instead.

This paper includes details of what data are shown in each of the RSR tables and brief notes where required to explain any differences. The notes are intended to alert the reader to the fact that they should explore differences in data between years in more detail by using the sister report. Where there is no direct comparison, this has been noted within the table and where the 2003 data creates a new table, this has also been noted.
